Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non obvious), or to be industrially applicable have not been examined in respect of:

☐ the entire international application

☒ claims Nos. 9-10

because:

☒ the said international application, or the said claims Nos. 9-10
relate to the following subject matter which does not require an international preliminary examination (*specify*):

See PCT Rule 67.1.(iv).: Methods for treatment of the human or animal body by surgery or therapy, as well as diagnostic methods.

☐ the description, claims or drawings (*indicate particular elements below*) or said claims Nos. _____

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Cited document:

D1) EP 1170594 A2

The present invention relates to novel 3-sulfonyl-indol-1-acetic acid derivatives for treatment of diseases mediated by PGD2 such as asthma or rhinitis.

Document D1 disclose structurally very closely related compounds (see compound 10c, page 34 and example 9) with the same activity as the claimed compounds.

The difference between the claimed compounds and the compounds in document is that compound 10c of D1 is that there is a sulfonyl-group in position 3 and that the aromatic group R3 is not condensed.

The problem to be solved by the present invention in the light of document A is the provision of alternative derivates of 3-substituted indol-1-acetic acids for treatment of diseases mediated by PGD2.

The applicant has not shown that the structural differences render the claimed compounds' unexpected effects in comparison with the known compounds'.

It is considered obvious to a person skilled in the art to modify structurally similar compounds to obtain the claimed compounds and come to the conclusion that they will have the same activity.

Thus, claims 1-8 and 11-14 are considered to fulfil the Requirement of novelty, but not that of inventive step.
